PROFESSIONAL SUMMARY

I am a versatile Software Developer with expertise in web and mobile app development using JavaScript, React.js, Postgres, Python, Kotlin and Django. Skilled in building scalable, user-focused solutions with seamless performance and security. Proficient in API integration, cloud services, and Agile methodologies, I thrive in dynamic environments, delivering high-quality software and driving innovation across teams.

EXPERIENCE

Full stack Developer

Nimo Enterprise- Mombasa, Kenya

June 2025-present

- Spearheaded development of Nimo Enterprise System, an automated web scraping solution that streamlined data ingestion and backend updates, reducing manual work by 80% and improving workflow.
- I designed and implemented a scalable Django **backend** to manage scraping jobs, process extracted data, and seamlessly update listings in the database with zero manual intervention.
- Deployed and maintained the platform on Heroku, ensuring high uptime, automated job scheduling, and efficient resource management across environments.
- Utilized Docker to containerize microservices for seamless deployment and environment parity.

EDUCATION

University of Eldoret

Eldoret, Kenya

B.S. of Science in Information Technology

September 2019 - April 2024

- **Concentrations: Software Developer**
- **Related Coursework:** Data Structures & Algorithms, Objects & Design, Computer Organization & Programming, Artificial Intelligence, Object-Oriented Programming, Statistics & Applications

CERTIFICATES

Udemy

Online

Java and Python Programming

April 2020

- Proficient in core Java concepts including object-oriented programming (OOP), inheritance, encapsulation, and polymorphism
- Ability to work with data structures, arrays, collections, and exception handling
- Experience with writing, compiling, and debugging Java applications using the JDK and IDE tools such as IntelliJ or Eclipse
- Proficient in Python fundamentals including variables, data types, loops, functions, and file handling
- Ability to work with Python libraries and modules for data manipulation and scripting tasks
- Experience with object-oriented programming in Python, including classes, inheritance, and error handling

PROJECTS

Family web application

Repository: <https://github.com/0xYmF5YQ/family>

Nov 2025 – April 2026

- Collaborated in a two-person team to design and develop a full-stack family management web application, enabling families to securely access and manage shared information through a centralized platform.
- Built the front-end using HTML, TailwindCSS and JavaScript, delivering a clean and intuitive user interface with role-based access control, ensuring authenticated family members can view relevant data upon login.

- Developed a robust back-end using Django and Django REST Framework, exposing RESTful APIs to handle core modules including family members, assets, events, and contributions.
- Integrated PostgreSQL as the relational database to efficiently store and manage structured family data, ensuring data integrity and reliable query performance across all application features.

Airline reservation system(ARS)

Repository <https://github.com/0xYmF5YQ/ARS>

July 2024 – Oct 2024

- Developed a fully-functional Airline Reservation System for a client using Django, React, and PostgreSQL, enabling users to search, book, and manage flight reservations with ease.
- Designed and implemented the backend architecture using Django, ensuring efficient data handling, security, and scalability for a high-traffic application.
- Developed a user-friendly front-end with React, creating a dynamic and responsive interface for customers to browse available flights, check pricing, and complete bookings.
- Implemented authentication and authorization features, including user login, profile management, and secure transaction handling for payment processing.
- Integrated PostgreSQL as the database system, ensuring seamless data storage for flight details, user profiles, and reservations with strong query optimization and data integrity.

SKILLS

Technical Skills

Programming Languages: Python, Kotlin, Java, C++, JavaScript, C#

Frontend: React.js, Next.js, TailwindCSS, Bootstrap, Framer Motion

Backend: PHP, Python Django, Supabase, Firebase, Sanity CMS

Mobile Development: React Native (Expo), Redux, Zustand

Databases: PostgreSQL, MongoDB, MySQL, Firebase Firestore

Cloud Services: Microsoft Azure, AWS, GCP

Tools: Git, GitHub, Figma, Android Studio, IntelliJ, PyCharm, Docker,

Kubernetes, Deno **APIs:** RESTful, GraphQL, Groq

Testing & CI/CD: Jest, GitHub Actions
